

12878 Oak Ridge Ln. • Holton, KS 66436

To Whom It May Concern:

As a General Contractor building homes for the past 28 years and being very involved in this community with economic development, I would like to ask for your support. Giant Communications is applying for grant funding through the NTIA Broadband Infrastructure Program.

One of the biggest needs in housing today with so many people working from their homes is reliable internet service. With reliable broadband service, a community will grow and prosper. Without it, a community will struggle for growth and prosperity.

Proper internet service is the wave of our future supporting work, schooling for our youth and leisure activities. I fully support Giant Communications' plan to expand high speed internet to this community.

Respectfully,

Mark Aeschliman
